

Night Like This

Coleman Hell

I found you on a night like this
Felt so good I could die like this
Tried and tried a million times I just can't forget
A love like that on a night like this

Night like this
Night like this
Night like this
Night like this

On a night like this, on a night like this
On a night like this
On a night like this, on a night like this
On a night like this

I can't sleep on a night like this
Got so deep I could dive right in
Tried and tried a million times I just can't forget
A love like that on a night like this

Can't change the [?]
I tried and tried
The only thing I [?]
Are nights like this

I found you on a night like this
Felt so good I could die like this
Tried and tried a million times I just can't forget
A love like that on a night like this

Night like this
Night like this
Night like this
Night like this
Night like this
Night like this
Night like this
Night like this

On a night like this, on a night like this
On a night like this
On a night like this, on a night like this
On a night like this
On a night like this, on a night like this
On a night like this
On a night like this, on a night like this
On a night like this

Night like this
Night like this
Night like this
Night like this
