

## Beginning

Colin Blunstone

As another day lays down its head  
I sit here reading by your light  
My mind is singing  
With all we've said  
Scared at how final it can be  
For wrong and right  
Are not black and white  
Everything falls in the middle  
Oh self doubt  
Surrounds you in the night  
You suddenly find yourself running  
Keep out the people  
Keep out the day  
Let us begin by beginning  
The secret of the future's never told  
Let us begin by beginning  
Let us begin by beginning
