

# Something Happens When You Touch Me

Colin Blunstone

I often wondered if the time would come when I felt suddenly so  
mebody  
It's really hard to be alone when you're not sure who you wanna  
be  
And then I found I got no ground, no longer could I hang around  
with nobody  
But when we sat, side by side, I knew that I'd never tried  
You took me out of the crowd, I just wanna shout out loud

Something happens when you touch me  
Something happens when you touch me  
Something happens when you touch me there

Many times I told myself, you're sitting here left on the shelf  
, all by yourself  
And nobody gets younger nowadays, living good is something that  
we all know pays  
I faced an empty life ahead but then I found you instead to sho  
w the way  
And when you took hold of my hand, I knew I could never stand  
It's not my fault that we felt down, you made my head go 'round  
and 'round

Something happens when you touch me  
Something happens when you touch me  
Something happens when you touch me there

I don't know what you got but you sure got a lot  
More than enough for me  
See me today and all days, I want you now and always  
Just say the word and I'll drop everything, everything, oh la l  
a

Something happens when you touch me  
Something happens when you touch me  
Something happens when you touch me there

Ooh la la la la ...

When you took hold of my hand, I knew I could never stand  
It's not my fault that we felt down, you made my head go 'round  
and 'round

Something happens when you touch me  
Something happens when you touch me  
Something happens when you touch me there

Something happens when you touch me

Something happens when you touch me  
Something happens when you touch me there
