

## Better Than I Can Imagine

Colin James

I'm lighting dynamite and staring at the sun again  
You walk in to the room and everything turns up to ten  
Oh you just can't run it down  
It's better when you're around

You are by far behind the stars  
Something better than I can imagine  
You are you seem to come to me  
Like a vision too bright to be happening  
Yeah you're better than I  
Better than I can imagine

It's a suicide drive along the edge of these rolling hills  
Riding your slipstream something's got a hold of the wheel  
You're everything I need to know  
So take me where you want me to go

You are by far behind the stars  
Something better than I can imagine  
You are you seem to come to me  
Like a vision too bright to be happening  
Yeah you're better than I  
Better than I can imagine

When the moon slips behind the clouds  
I keep following your light around  
It's dark downtown I'm walking but I'm not done  
When the red light river takes the crowd and delivers it home,  
delivers it home

You are by far behind the stars  
Something better than I can imagine  
You are you seem to come to me  
Like a vision too bright to be happening  
Yeah you're better than I  
Better than I can imagine

Yeah you're better than I  
Better than I can imagine  
Yeah you're better than I  
Better than I can imagine  
Yeah you're better than I  
Better than I can imagine
