

Shed A Little Light

Colin James

They say that love is hard to find
I sure found hard to find mine
Love walked right up to my face
She said you know love what you die for babe

Shed a little light so I can find you
Don't let darkness hide you from my face
Shed a little light so I can find you
I sure will die for your embrace

The say that second love, second love reveals
Trouble is hard on its heels
Love walked right up stood by my side
They say that its love or death baby no need to desire

Shed a little light so I can find you
Don't let darkness hide you from my face
Shed a little light so I can find you
I sure will die for your embrace

Shed a little light so I can find you
Don't let darkness hide you from my face
Cuz I gotta light that is sure to find you
It just might blind before that day
Shed a little light so I can find you
Don't let darkness hide you from my face
Shed a little light so I can find you
I sure will die for your embrace

They say that love is hard to find
I sure found hard to find mine
