

You Know My Love

Colin James

Though time has passed and months have gone
But your love in my heart has lingered on
But when I get worried
I slip away and I cry

You know my love
You know my love
You know my love has never died

You're gonna find many things to pacify your mind
You'll even get married trying to have a good time
But all you do you will never rest
You're gonna spend your life full of loneliness
And when you're down and out
You'll need a home
You're gonna need a friend
And find I've flown
But when I get worried, I slip away and I cry

You know my love
You know my love
You know my love has never died
