

I Know You, You Know Me

Collective Soul

Close the door
I think we found what we were looking for
I think we found it this time, for sure

A quiet find
A room that always eases up our mind
A place that's always just yours and mine

I know you, you know me
One plus one equals all we can be, yeah
I know you, you know me

Let's try no more
I think we found what we were looking for
I know we found it this time, for sure

Space and time
That moment always eases up our mind
Those memories are just yours and mine

I know you, you know me
One plus one equals all we can be, yeah
I know you, you know me
I know you, you know me
I know you, you know me
I know you, you know me, yeah
