

Letter From E

Collective Soul

One, two, three, four

I can't wait 'til the stars collide
Patience has never been a friend of mine
Still, this soul in which I do reside
Lays me down in peace every night

I know that time's not easily found
I don't have time in my pocket
'Cause time never sticks around
So I can't love you more than I love you now

I've watched the sun rise to watch it set
Won some money just to hedge that bet
Nothing lost is nothing gained, I accept
But knowing you, I'll never ever regret

I know that time's not easily found
I don't have time in my pocket
'Cause time never sticks around
I can't love you more than I love you now

I know that time's not easily found
I don't have time in my pocket
'Cause time never sticks around
So I can't love you more than I love you now

Yeah, I can't love you more than I love you now
