

Rule No. 1

Collective Soul

It's only love if it hurts
Bow down low, face in the dirt
It's only love if we're scared
Hop that train to God knows where

It's only love, should we change
It's only love, should we choose to stay the same
It's only love if we feel
It's only love if we're real

It's only love if we cross
Borders of emotions we know have been lost
It's only love if we fear
Happiness as much as the tears

It's only love, should we change
It's only love, should we choose to stay the same
It's only love if we feel
It's only love if we're real

Down dirty
And life's still swirling
And God's out surfing
So we're left learning to love
Learning to love

It's only love, should we change
It's only love, should we choose to stay the same
It's only love if we feel
It's only love, love
It's only love, should we change
It's only love, should we choose to stay the same
It's only love if we feel
It's only love, love, if we're real
