

## Fix

## Collide

You fix the hole inside of me  
You place the blame  
You heal the soul inside of me  
Still I feel the same

I am between mind and matter  
I have only just begun again  
Counting on the things that I believe

You're so far away, I'm something  
Cloud and disappear  
Not so far away, I'm something  
All I really need

You fix the broken part of me  
You light the flame

You break the heart inside of me  
Still we feel the same

I am between mind and matter  
I have only just begun again  
Counting on the things that I believe

Fix because you are broken

You're so far away, I'm something  
Cloud and disappear  
Not so far away, I'm something  
All I really need

You're just a part of me  
You're just a part of me
