

Soul Crush

Collide

Soul crush and fade away go on and on and on

Soul crush I need you, I wanted to, you are not alone

You can never understand my point of view

I can never understand your point of view

You can change your mind

When you change your mind

You can change your mind

When you change your mind

Soul crush I'm human

It hurts me, you are not alone

Floating down the river, I whisper, you are not alone

Obsession I shiver, I wanted, you are not alone

Unstable your distortion clearing out all of the debris

Unstable your emotion love heals all so let it be

You can never understand my point of view

You can never understand my point of view

You can change your mind

When you change your mind

You can cover up, you can cover up

Distance that I have

Soul crush I'm human

It hurts me, you are not alone

Soul crush I'm human

It hurts me, you are not alone
