

Hate Like Me

Combichrist

I'm here to tell you something you won't like
You'll fucking hate it, there is nothing left inside
Empty threats pouring out of the wounds
Used to be a fucking star
Look at you now

That is the way we used to hate
Together as one crew against the one crew
Today we're here standing face to face
Not as one crew against the one crew

Don't even know who you are
Come inside, don't be late
You used to be a fucking star
That is the way that we used to hate

You used to hate like me
What happened to you? (You)
You used to hate like me
What happened to you? (You)

What happened to you? Was it all a phase?
Together as one crew against the one crew
Licking the broken dreams off your face
Not as one crew against the one crew

Don't even know who you are
Come inside, don't be late
You used to be a fucking star
That is the way that we used to hate

You used to hate like me
What happened to you? (You)
You used to hate like me
What happened to you? (You)
You used to hate like me
What happened to you? (You)
You used to hate like me
What happened to you? (You)

With a beer in your hand
Watching TV, your church is your couch
Thinking of me and all your broken dreams
Am I right?
And how you wish to go back
To the way that you used to hate

You used to hate like me
What happened to you? (You)
You used to hate like me
What happened to you? (You)
You used to hate like me
What happened to you? (You)
You used to hate like me
What happened to you? (You)
