

## Any Day From Now On

Conchita Wurst

Like a fire in the night  
I will rise one more time  
Let me take your hand  
It's alright, you will see  
Like a phoenix in flight  
We'll be savage and wild

And I know now how beautiful we can be  
We can be

Any day from now on  
Is the day I belong  
To you  
Now till forever with you  
We're in this together, so you  
Can leave all your dark clouds behind

When the pale morning comes  
Turn your face to the sun

We're a light that never goes out  
And a song that goes on

Any day from now on (Any day from now on)  
Is the day I belong (Is the day I belong)  
To you (Any day, any day, any day from now on)  
Any day from now on (Any day from now on)  
Is the day I belong (Is the day I belong)  
To you (Any day, any day, any day)  
Now till forever with you  
We're in this together, so you  
Can leave all your dark clouds behind
