

Played the Game

Confederate Railroad

I've been in love, I've been insane
Took the pleasure shook the pain
I've been mellow as a morning rain
Embrace the love to hurricane
I thrown caution to the wind
Lord knows I've been the devil's friend
I've danced the pains of a [?]
I'd do it all again

I played the game and paid the price
Watched true love turn cold as ice
I've been down with nothing left inside
I played the game and paid the price
I played the game and paid the price
Been called some names, burn through an ice
You came close to the truth there once or twice
I played the game and paid the price

Tried hard to do things our own way
Saying what I mean meaning what I say
So don't go standing in my way
I'm gonna bow down when I pray

I played the game and paid the price
Watched true love turn cold as ice
Been down with nothing left inside
I played the game and paid the price
I played the game and paid the price
Been called some names, burn through an ice
You came close to the truth there once or twice
I played the game and paid the price
You came close to the truth there once or twice
I played the game and paid the price
