

# Robot

Confetti

I don't want a friend  
I want a friend that I control  
I want a robot  
I want a robot  
I don't need nobody  
Telling me what I don't know  
I'll ask a robot  
I'll ask a robot

'Cause AI AI AI  
Always seems to know the truth  
And when I see the future  
All I ever see is you  
'Cause AI AI AI  
Is the button to the nukes  
Now that we'll live forever  
I don't care if it goes boom

Ah, tech-savvy in the modern world  
Left my old little lassie for the upgraded chassis  
Yeah I'm at it like the dark web and twirling' curls  
Making impressions, your honorable mention  
She got the recoil yeah, all the cheat codes  
Wherever we go, it's on the remote  
And now we're talking nuclear fusion  
If it's the human race we run and we losing (Let's go!)

I don't want a friend  
I want a friend that I control  
I want a robot  
I want a robot  
I don't need nobody  
Telling me what I don't know  
I'll ask a robot  
I'll ask a robot

Ah, boom  
Check it, robot robot  
Click it, zoom  
Buff it, shot for shot  
Give me, power  
Show me the flowers  
Dopamine showers  
Keep me in for hours

Back it up, pop it yeah I'm on that level  
Got a new dimension in my VR, my vessel  
The devil wears Prada but I think she wear an apple  
Make me wanna bite 'cause damn I really love a scandal

'Cause AI AI AI  
Always seems to know the truth  
And when I see the future  
All I ever see is you  
'Cause AI AI AI  
Is the button to the nukes  
Now that we'll live forever

I don't care if it goes boom

I don't want a friend  
I want a friend that I control  
I want a robot  
I want a robot  
I don't need nobody telling me  
What I don't know  
I'll ask a robot  
I'll ask a robot
