

Spaced Out

Confetti

I feel like a zombie talking to a barbie
Both of us dead inside
All of my tension feeling pretty distant
Every time you roll those eyes
But I have a disease and that's why I do drugs
I'm all out of reasons

The frequencies are jamming
The static left is all I hear

Sorry I spaced out
What were we talking about
I'm always letting you down
I see you moving your mouth
But I'm not hearing a sound
I'm sinking deep in the couch
Spaced out

All spaced out
And been for so long that I can't even count
The doubts, the doubts
Of whether I'm conscious or nowhere to be found
Knock on my head like you who snaps in front of my face
Wave both hands but excuse me my antenna side of things

The static left is all I hear

Sorry I spaced out
What were we talking about
I'm always letting you down
I see you moving your mouth
But I'm not hearing a sound
I'm sinking deep in the couch
Spaced out

Something's wrong with my brain
I'm not trying to be insane
Something's wrong with my brain
And I just want to feel the same

Sorry I spaced out
What were we talking about
I'm always letting you down
I see you moving your mouth
But I'm not hearing a sound
That's where I see myself out

Sorry I spaced out
What were we talking about
I'm always letting you down
I see you moving your mouth
But I'm not hearing a sound
I'm sinking deep in the couch
Spaced out
