

Wake Up

Confetti

Wake the fuck up

It's a brand new world
Don't stop for no one
It's a brand new world
You don't wanna be old news

I just woke up this morning now I got enemies
Make sure what's important's good when you go to sleep

You don't wanna be old news
Looking bad a year or two like I told you
You need to set sails or break ties with the old crew
'Cause when the carnival sinks there'll be no cruise yeah
So give the people what they want, what they want
Double down and double up, double up
You gotta feed the beast 'till it pops
'Cause you don't wanna be one of the ones that got stuck

I just woke up this morning now I got enemies
You should stop ignoring all the realities
Make sure what's important's good when you go to sleep
But don't go to sleep
(Wake up, wake up)

Look around at your hungry replacement
You gon' find that familiar the faces
Do you feelin' like you loosing the race
Disappear without a trace the kind that lives in your basement
Some people rather run and hide
Some people wanna fight and make it justified
By any means necessary, best survive
'Cause you don't wanna see the world you left behind

I just woke up this morning now I got enemies
You should stop ignoring all the realities
Make sure what's important's good when you go to sleep
But don't go to sleep
(Wake up, wake up)

Hey I really really need you right now
Hey
Hey I really really need you right now
(Wake up, wake up)

It's a brand new world
Don't stop for no one
It's a brand new world
You don't wanna be old news

I just woke up this morning now I got enemies
Make sure what's important's good when you go to sleep
(Wake up)
