

## Just Let Me Know

Connie Smith

If you're trying to win my heart there's no denying  
I admit, you don't have very far to go  
So when you wanna talk to me about forever  
I'll be yours from now on, just let me know

When love like this comes along, it's such a treasure  
And it amazes me how deep real love can go  
Oh, you're the one I have dreamed about forever  
And the way you've touched my heart just lets me know

When you're here in my arms who needs tomorrow?  
Together day by day we'll watch love grow  
And anytime you need some love and understanding  
I'm always here for you, just let me know

With you here in my arms who needs tomorrow?  
Together day by day we'll watch love grow  
And anytime you need some love and understanding  
I'm always here for you, just let me know  
Yes, I'm always here for you, just let me know
