

## Three Sides

Connie Smith

There's three sides to every story  
We could lie and say there's two  
There's three sides to every story  
Your side and mine, and the truth

Right now you and I  
Can't see eye to eye  
We both know there's a way  
To get past all this pride

There's three sides to every story  
We could lie and say there's two  
There's three sides to every story  
Your side and mine, and the truth

Neither of us wins  
If we can't compromise  
And we've loved way too long  
To let love die

There's three sides to every story  
We could lie and say there's two  
There's three sides to every story  
Your side and mine, and the truth
