

# Together Alone

Connie Smith

So many things to see in this old world but all I can see is you  
In a crowded subway train walkin' in the country rain you're there with me too  
All of the songs sung in any day your voice is all I hear  
Though each song has its own place finished quickly fades away  
I hear you everywhere  
And though I know you want me pleased with everything I do  
Honey I can find the way to open look what I don't like about you  
Well it's been said many times that we are by ourselves and each man is on his own  
I don't care that may be true I just wanna be with you  
Together alone  
And though I know you want me...
