

## Our Desire

Conor Maynard

Slow down the night  
I could stay here for my life  
Fixed in this vision of you  
Two hearts collide  
Make the stars light up the sky  
Whisper a dream in your ear

I could stay here with you 'til the morning  
I could leave here with you in the night  
Should we run away and take this to another height  
Let the stars lead our desire  
Let the stars lead our desire

Let the stars lead our desire  
Let the stars lead our desire  
Let the stars lead our desire  
Let the stars lead our desire

Kiss me a dream of an ocean  
Hold me in peace while I'm falling in love  
Help me to see where I'm going  
Take me to paradise

'Cause tonight is filled with wonder  
I can see you in a crowd of a thousand spotlights  
'Cause you shine like the highest power  
Could you take me to paradise

I could stay here with you 'til the morning  
I could leave here with you in the night  
Should we run away and take this to another height  
Let the stars lead our desire  
Let the stars lead our desire

Let the stars lead our desire  
Let the stars lead our desire  
Let the stars lead our desire  
Let the stars lead our desire

I could stay here with you 'til the morning  
I could leave here with you in the night  
Should we run away and take this to another height  
Let the stars lead our desire  
Let the stars lead our desire
