

# Martian Gods

## Conquest

Unknown landscape is standing before my eyes  
And mind refuses to believe  
Beings with four hands fly on the rays of light  
In ships crafted with giant wings

Together with my new brave friends  
Against the unknown threat  
Crossing the great miles of badlands  
We're in our quest

The ancient plot turned into the cruel game  
By the mysterious ones  
To destroy this world like many other planets  
The next target is the earth

This time they'll got the strict repulse  
We'll change the course of things  
For the first time their plan will fall  
Under prompt fling

Dusty roads of alien planet  
Lead us to the gate of power  
In the battles for our future  
We become just like the Martian gods

Together with my new brave friends  
Against the unknown threat  
Crossing the great miles of badlands  
We're in our quest

Dusty roads of alien planet  
Lead us to the gate of power  
In the battles for our future  
We are in the great adventure

Now my home is alien planet  
History flows in new riverbed  
In the battles for our freedom  
We become just like the Martian gods
