

## Taste Of Life

### Conquest

Broken, withered  
Falling deeper

Never used to hear your mind  
Always floating downstream of life  
But river's dry

Like the puppet in the arms  
Of invisible force you beg for  
Mercy

Look back!  
- Life is never the same  
Changing by the hidden laws and  
Future will bring new taste to live  
Your life  
And you build it with your dreams

Holding weakness  
Mental sickness

Blinding fear and silent scream  
You've been always running out of real  
With misery

But the answers are around  
You have never tried to find the way  
To know!
