How did we end up here
With our eyes filled with tears
Can't we love like we're young again
Only you know the shit we've been through
We survived hand in hand and will dance again

You're the missing link in my chain Even when it drives me insane And I wouldn't change a thing about that You're the beat that makes my heart skip And you never let me forget I wouldn't have it any other way

I know we're gonna make it
As long as we're together
We got a different kind of love
You know we got a different kind of love
No other way to say it
Nobody does it better
Oh we got a different kind of love
We got a different kind of love

In their eyes I see yours

Don't know much but I'm sure

That I'm right where I need to be

In this life or the next I will find

You again and again

You're the one for me

You're the missing link in my chain Even when it drives me insane And I wouldn't have it any other way

I know we're gonna make it
As long as we're together
We got a different kind of love
You know we got a different kind of love
No other way to say it
Nobody does it better
Oh we got a different kind of love
We got a different kind of love

Ohhhhh ohhhh We got a different kind of love Ohhhhh ohhhh We got a different kind of love

We got a different kind of love
