

Shadow

Conrad Sewell

Even when the city's dark, baby
I'll be underneath your feet
I'll be wherever you are, baby
See what no one else can see
I love to be your shadow
Stand next to your fire
Yea I love to be your shadow
With you all the time

I wanna go your way
Every night, girl and every day
When you're sleeping, or you're awake
I love to be your shadow
No need to be afraid
Let you know girl, I'm here to stay
I'll be there every step you take
I love to be your shadow

When you want me in your arms, baby
I'll never be out of reach
When you wake up in the morning, baby
With the sunrise in the east
I love to be your shadow
Stand next to your fire
Said I love to be your shadow
With you all the time

I wanna go your way
Every night, girl and every day
When you're sleeping, or you're awake
I love to be your shadow
No need to be afraid
Let you know girl, I'm here to stay
I'll be there every step you take
I love to be your shadow

With you all the time
I love to be your shadow
With you all the time
All the time

I wanna go your way
Every night, girl and every day
When you're sleeping, or you're awake
I love to be your shadow
No need to be afraid
Let you know girl, I'm here to stay
I'll be there every step you take
I love to be your shadow
