

World Downfall

Convulse

When will we learn not to hate ourselves
We're like wolves with a hunger for blood
Unsatisfied with the need of something more
Fulfilling our inner void
We're like fierce lions with our greed
Blind eyes have faith in immortality
Trying to explicate the bestiality
We devastate everything we see

Lies. Fear. Death is all I can see

This is the world downfall
Hope is all behind, the future darkest kind
This is the world downfall
All hope is gone in this world downfall

Cockroaches rule this kingdom of putrid corpses
Violated ruining cadaver embeds the unborn child
Nuclear fallout darkens the blood red sky
Where is redemption, where is your god now?

March on through the terror and hate
Death is all I can see

This is the world downfall
Hope is all behind, the future darkest kind
This is the world downfall
All hope is gone in this world downfall

This is the world downfall. This is the world downfall...

All hope is gone
In this world downfall
Where is your redemption
Where is your god now?
