

## If You Can't Write The Music

Conway Twitty

If you can't write the music you can sing the song  
If you don't feel like dancin' you can clap along  
There's a dream for every dreamer so let the band play on  
If you can't write the music you can sing the song.

When your life has no direction try to understand  
There's a rhyme for every line a place for every man  
Join the celebration before the music fades  
Don't just stand there watching start your own parade.

If you can't write the music you can sing the song  
If you don't feel like dancin' you can clap along  
There's a dream for every dreamer so let the band play on  
If you can't write the music you can sing the song.

A winner's just a loser who made another try  
So spread your wings and give your dreams another chance to fly  
Reach out for a rainbow hold it in your hand  
If you can't write the music why not lead the band.

If you can't write the music you can sing the song  
If you don't feel like dancin' you can clap along  
There's a dream for every dreamer so let the band play on  
If you can't write the music you can sing the song.

If you can't write the music you can sing the song  
If you don't feel like dancin' you can clap along  
There's a dream for every dreamer so let the band play on  
If you can't write the music you can sing the song...
