

## Love Is The Foundation

Conway Twitty

I've seen her as she awakens in the morning  
She reaches out her hand and without a word  
As her fingers softly fall upon my face  
She lights the flame of desire and makes me want her

And love is the foundation we lean on  
All you need is love to ease your mind  
And does it have to be right to be called love  
When she gives me more loving  
Than a lifetime of looking could ever find

And love is the foundation we lean on  
All you need is love to ease your mind  
And does it have to be right to be called love  
When she gives me more loving  
Than a lifetime of looking could ever find
