

Night Figures

Copeland

Don't count me out
I feel you
Fading me out
As the calmness around us is whispering
Fumbling in the dark
You're emotionless when you look at me
Hiding in your words
You're emotionless just like me

Yeah

Night figures all around us
Night figures, they surround us
While I kiss her in the dark
I feared that they would drown her
But they crown her the queen of broken hearts

Don't count me out
I feel you
Fade the lights down
I'll still trace every line of your symmetry
Fumbling in the dark
Like a drunk in the street when you look at me
Hiding in your words
You're emotionless just like me

Night figures all around us
Night figures, they surround us
While I kiss her in the dark
I feared that they would drown her
But they crown her the queen of broken hearts

Night figures all around us
Night figures, they surround us
While I kiss her in the dark
I feared that they would drown her
But they crown her the queen of broken hearts

Night figures, they surround us
While I kiss her in the dark
I feared that they would drown her
But they crown her the queen of broken hearts
