

When I'm Lonely

Corey Kent

I hang up those keys
Kick my old boots off
It all looks the same
But I'm lost
Found that midnight buzz
I went looking for
But it don't feel so good anymore
There's nothing like an empty room
To guarantee I don't hear from you

How do you know when I get lonely
How do you feel it when I'm falling apart
One little call and I come running
Right back to your arms
And I know you ain't gonna stay
But it doesn't matter anyway
You know when I'm lonely
I just can't say no when I'm lonely

I'll leave that door unlocked because you're on your way
Let that candle burn what's one more flame
We both know this ain't love
But tonight it's close enough

How do you know when I get lonely
How do you feel it when I'm falling apart
One little call and I come running
Right back to your arms
And I know you ain't gonna stay
But it doesn't matter anyway
You know when I'm lonely
I just can't say no when I'm lonely

It hurts still in the morning light
That don't matter much tonight
How do you know when I get lonely
How do you feel it when I'm falling apart
One little call and I come running
Right back to your arms
And I know you ain't gonna stay
But it doesn't matter anyway
You know when I'm lonely
I just can't say no when I'm lonely
No when I'm lonely
