

Up there in Sweden
Lives a small girl
She strikes all Fridays
She makes the minds swirl

Scientists have told us
What is to come
And she did believe it
But most men stay numb

She might save our planet
Small girl fights for climate
She fights to keep this Earth our home
And she might save this whole planet
This world and its climate
Brave girl, she fights for her home

Future might be bright as a rainbow
In a clear and deep blue sky
With clean oceans again
Healthy woods and skies
If we will care

If we will dare
To change our life
To start to strive for life

Fridays for future
Became the voice
All of those school kids
They just made their choice

Reason is growing
Amongst the blind
They start to think over
They might change their mind

She might save our planet
Small girl fights for climate
She fights to keep this Earth our home
And she might save this whole planet
This world and its climate
Brave girl, she fights for her home

Future might be bright as a rainbow
In a clear and deep blue sky
With clean oceans again
Healthy woods and skies
If we will care

She might save our planet
Small girl fights for climate
She fights to keep this Earth our home
And she might save this whole planet
This world and its climate
Brave girl, she fights for her home

Future might be bright as a rainbow
In a clear and deep blue sky
With clean oceans again
Healthy woods and skies
If we will care

If we will dare
To change our life
To start to strive for life
Now!
