

Live Before I Die

The Corrs

Come to me when day is done
We can chase away the dawn
Lift me up and pull me down
'Til we come crashing into the ground
Nothing here is nothing less
A gentle sigh your dark caress
Let me ride upon that wave
Far far away
To the edge of the world

Where nothing's wrong
And nothing's right
Don't want to know the reason why
Just wanna live before I die
Where nothing's real
And nothing's sad
Just let me be in the moment
So I can live before I die

Kiss me with the morning light
Chase the demons, make them fly
Let me lie here for a while
So I can wait until tonight
Catch my dreams and make them real
I need a place where I can be
Where there's only you and me
Far far away
To the edge of the world

Where nothing's wrong
And nothing's right
Don't want to know the reason why
Just wanna live before I die
Where nothing's real
And nothing's sad
Just let me be in the moment
So I can live before I die

Where nothing's wrong
And nothing's right
Don't want to know the reason why
Just wanna live before I die
Where nothing's real
And nothing's sad
Don't wanna know the reason why
Just wanna live before I die

Where nothing's real
And nothing's sad
Just let me be in the moment
So I can live before I die
Before I die
