

Waiting

Cory Wells

Stay close to me
Erase the cold in-between us
Play back that night
I stole the shake from your knees
Asphalt and trees
Behind the van I held you
Were all over me
We shared that kiss and I knew

We're in too deep now

Maybe this just can't last forever
But tell me baby, you'll stay with me tonight
And why can't we just piece this back together
Instead of waiting til' we fall apart and I break your heart again?

I won't break your heart again

Think back to when
I couldn't sleep so I called you
Let down your guard
Became the break in my fall
We were so in love
The scent of weed and perfume
Cause I get so fucked up
When I'm addicted to you

You're all I need now
We're in too deep now and I'm not sorry

Maybe this just can't last forever
But tell me baby, you'll stay with me tonight
And why can't we just piece this back together
Instead of waiting til' we fall apart and I break your heart again?

Well maybe this just can't last forever
But tell me baby, you'll stay with me tonight
And why can't we just piece this back together
Instead of waiting til' we fall apart and I break your heart again?

I'll never break it again
