

# Wildfire

Cory Wells

They told me not to trust you  
Well I wish they were wrong  
And I've been such a fool  
All your lies course through your veins  
But now I see you inside-out

You lit a match just to watch my world burn

You tried to take everything I love  
Just like a cancer inside my lungs  
You tried to burn my house to the ground  
With what you say when no one's around

Spreadin' like a wildfire  
You're a wildfire

Alone again and you're wonderin' why  
You're so wrapped up in yourself  
Believing all your lies  
You put the blame on somebody else  
It always seemed so upside-down

You lit a match just to watch my world burn

You tried to take everything I love  
Just like a cancer inside my lungs  
You tried to burn my house to the ground  
With what you say when no one's around

I want you to know  
If you fall I hope the world sees you drown  
Forever lost in the depths of your soul  
So just go  
Take your demons and seek out the day  
You fuckin' reap what you sew

You tried to take everything I love  
(You tried to take it away)  
Just like a cancer inside my lungs  
You tried to burn my house to the ground  
With what you say when no one's around

Spreadin' like a wildfire  
(Spreadin' like a wildfire)  
You're a wildfire  
(So fuck you)  
Wildfire  
You're a wildfire
