With U

Cosmo's Midnight

Cause it's easy to recall you
I want you to know that
This could be the end of us
Cause it's easy to recall
What you feel despite it all
I can feel the strain on us

Somethings drop off
Trying for the right moment to overcome
Tell me if this isn't love
Falling in firefall
Falling in the fire
Sometimes we just lose control
Staying in the right moment [?]
When we have to say those things
Don't want you to know that I'm feeling this toll

Cause it's easy to recall you
I want you to know that
This could be the end of us
Cause it's easy to recall
What you feel despite it all
I can feel the strain on love

It's easy to be here with you
I keep tripping on your heart
It's easy to be here with you
I keep tripping on your heart

Somethings fall off
Looking for the right moment to overcome
Tell me baby how you are
Falling in the firefall
Falling in the fire
Sometimes I just can't let go
Keeping in the right moment to overcome
This is something that you want
Don't want you to know that I'm feeling this toll

Cause it's easy to recall you
I want you to know that
This could be the end of us
Cause it's easy to recall
What you feel despite it all
I can feel the strain on love

It's easy to be here with you
I keep tripping on your heart
It's easy to be here with you
I keep tripping on your heart
Just wanna be right now
It's easy to be here with you
I keep tripping on your heart
It's easy to be here with you
I keep tripping on your heart
Just wanna be right now
It's easy to be here with you

I keep tripping your heart
