Hanginaround

Counting Crows

```
   F             C           G
1. She sat right down on the sofa
                           F              C             G
   And says where have you been I've been waiting for you
        F            C               G
   And last night I had something so good
                           F            C           G
   These days get so long and I've got nothing to do

                    F            C         G
R: Ive been hanging around this town on a corner
                   F                 C        G
   Ive been bummin around this old town so long
                    F            C         G
   Ive been hanging around this town on a corner
                   F                 C            G
   Ive been bummin around this old town for way too long

   F            C               G
2. We spent all day getting sober
                        F
   Just hiding from daylight
       C            G
   And watching tv (...fading away)
   F               C                G
   We just look a lot better in the blue light
                          F
   Well you know I gotta get out
       C
   But Im stuck so tight
   G
   Weighed by the chains that keep me

R:  hanging around this town on a corner...

   F            C               G
3. This girl listens to band plays

   She says where have you been
   F                  C               G
   Been laying right here on the floor
   F           C             G
   I got all this time to be waiting for what is mine
         F              C             G
   To be hated for what I am after the light has faded

R: Ive been hanging around this town on a corner
   Ive been bummin around this old town so long
   Ive been hanging around this town on a corner
   Ive been bummin around this old town for way too long, hey

   Ive been hanging around this town on a corner
   Ive been bummin around this old town for way too long
   Ive been hanging around this town on a corner
                    F                C            G                    F  C
   I've been bummin around this old town for way, way, way, way, too long
```

```
   G              F            C
*:  way, way, way, way, too long
   G              F            C
    way, way, way, way, too long
   G              F            C
    way, way, way, way, too long
   G              F            C
    way, way, way, way, too long
   G              F            C
    way, way, way, way, too long
   G              F            C
    way, way, way, way, too long
```
