

Chow

Cows

Hot hairy herds moving across my plains
Big driving hordes of thriving game
But you had to take up the gun
And ruin everybody's fun

It's a chow

You voted with your feet
You tricked me for my meat
You set my world on fire
And then you let me burn to death

It's a chow

I've had a belly-full of the lead you call love
You stabbed me in the back
Then you cut my pleasure sack

It's a chow

I ate the bugs, shit and the mold
I always did what I was told
They say it's evolution
Your god don't know how

It's a chow

You study me and wonder why
I grit my teeth and wait for the lies
You're shitting in my nest
Well just look up, because you're next

It's a chow
