

Still Left With Me

Craft Spells

To be thrown into the air
You don't care what they all think

The fall had passed
Your friends won't last
And you're still left with me

The spring will cut us deep
Like a dagger in between
The pain had passed
Your love is vast
And you're still left with me
Underneath what's become of me
I lost track of all the uncertainty
Keep you close and tough like history
After the fire, you're still left with me
And the nights are so sweet
When we ignore the misery

The silenced passed
There's warmth at last
And you're still left with me

When the silence gets too deep
I won't let it conquer me

Time has passed
You're here at last
And you're still left with me
