

It's About Time

Craig Campbell

Have you ever hit a dirt road on a full moon night?
Rolled the windows down, hit the gas, and killed the lights
Felt the rush of the wind
With the honeysuckle scent
Breathed it in and closed your eyes
Well, it's about time, yeah

Ever danced barefoot in the grass to the radio?
In a country boy's arms that told you you were beautiful
Or had a long, slow kiss
And the minute that it hit
Your lips, it curled your toes
Well, it's about time, yeah

It's about damn time, it's been too long
Baby, come on, let me turn you on
Ain't got to worry 'bout nothin', I got this, yeah
Girl, if you've never seen the stars from a truckbed
Hangin' over your head
Just before sunrise
Well, it's about time, yeah

Have you ever heard a night so quiet you could hear the trees?
Ever get so lost that you never wanna leave?
Have you ever let your heart
Run wild in the dark
'Cause you wanna see where it leads
Well, it's about time

It's about damn time, it's been too long
Baby, come on, let me turn you on
Ain't got to worry 'bout nothin', I got this, yeah
Girl, if you've never felt the breeze on your bare skin
Layin' on a blanket
It'll change your life
And it's about damn time, oh, yes it is

It's about damn time, it's been too long
Baby, come on, let me turn you on
Ain't got to worry 'bout nothin', I got this, yeah
Girl, if you've never seen the stars from a truckbed
Hangin' over your head
Just before sunrise
Ooh, been lost in the moment
And it felt so right
Well, it's about damn time, yeah
Well, it's about time
