

Never Regret

Craig Campbell

Hot summer night on the hood of my Mustang
You're looking so fine go on and scratch my paint
If it gets any hotter than it has been
Ain't no tellin' what might happen

Girl, you better be careful with those kisses
Don't play around with that fire in your eyes
You're starting something that I wanna finish
So watch what your hands do next
Before you make me do something I'll never regret, yeah

When you say my name I can't handle it
You're throwing off sparks that ain't even the half of
it
Girl, your touch lights me up like Georgia moonshine
Keep on going and I'll have to make you all mine

Girl, you better be careful with those kisses
Don't play around with that fire in your eyes
You're starting something that I wanna finish
So watch what your hands do next
Before you make me do something I'll never regret

Like fallin' in love tonight
Like doin' what feels right

Girl, you better be careful with those kisses
Don't play around with that fire in your eyes
You're starting something that I wanna finish
So watch what your hands do next
Before you make me do something
Oh you know I wanna do something I'll never regret,
yeah
No I'll never regret
