

# Okay Cupid

Craig Cardiff

Okay Cupid  
She is ready  
Send her a soul to love  
Make him tall with lines of poetry  
Roomies, if you got some  
In December they'll remember  
How love favored the bold  
In February they'll know  
It's time to come in from the cold

We're all perfect  
Shiny static  
Standing tall on our own Okay Cupid

Send us someone to see  
Through all the games we throw

Who will know? Know she is the one  
Okay cupid  
Send someone

Build them quickly  
Up in your factories  
On the dark side of the moon  
Sent down in moonbeams  
Stored in ocean waves  
Send them soon

And lover's know where love comes from  
Okay Cupid  
Send someone

Sometimes she gets so sad

When she's sad it rains for days  
But she is worried  
That if he sees all this rain  
He might now stay

Build him  
So he know she is the sun  
Everybody knows that the rain  
Can erase the sun

Build them quickly  
Up in your factories  
On the dark side of the moon  
Sent down in moonbeams  
Stored in ocean waves  
Send them soon

And lover's know where love  
Comes from Okay Cupid  
Send someone

Okay Cupid  
Send her someone

Send her a soul to love  
Build him tall with lines of poetry  
Roomies, if you got some

In December they'll remember  
How love favored the bold  
In February they'll know  
It's time to come in from the cold
