

# DNA

**Craig David**

There's somethin' in your DNA  
'Cause heaven did it right, baby, when you were made  
You hit it different, I feel some type of way  
I'll never be, never be the same  
There's somethin' in your DNA, N-A  
'Cause heaven did it right, baby, when you were made  
You hit it different, I feel some type of way  
I'll never be, never be the same  
There's somethin' in your DNA

Yeah

When you're close to me, we can't help but explore  
You touch every part of me  
And when we kissed, you left me beggin' for more  
I just want more

You're in my bones  
You're in my veins  
It feel like home when you're holding me  
You're in my soul  
And I can't explain  
You take me to another place

There's somethin' in your DNA  
'Cause heaven did it right, baby, when you were made  
You hit it different, I feel some type of way  
I'll never be, never be the same  
There's somethin' in your DNA (N-A)  
'Cause heaven did it right baby, when you were made  
You hit it different, I feel some type of way  
I'll never be, never be the same  
There's somethin' in your DNA

Yeah

When I saw you it felt like we met before  
In another life, another time  
I know that for sure  
Let's not pretend this ain't what we've been waiting for (For)  
What we've waited for

You're in my bones  
You're in my veins  
It feel like home when you're holding me  
You're in my soul  
And I can't explain  
You take me to another place

There's somethin' in your DNA  
'Cause heaven did it right baby, when you were made  
You hit it different, I feel some type of way  
I'll never be, never be the same

There's somethin' in your DNA (N-A)  
'Cause heaven did it right baby, when you were made  
You hit it different, I feel some type of way

I'll never be, never be the same  
There's somethin' in your DNA

Ooh, I

DNA
