

Good Time

Craig David

It is almost six in the morning and I'm having so much fun
When most people's beds will be calling
But I ain't tired so if you are feeling sober
Now is time to change
Take a shot of tequila and we can do the same
But before we go home we call it a day
Let's talk this fúcking song for this pain...
Put your hands in the air
I came to have a good time, hands in the air
I came to have a good time, hands in the air
I came to have a good time, hands in the air
I came to have a good time
Good time good time time time time
Came to have a good time time with you
Came to have a good time time time time
Came to have a good time time with you

Celebrate together yeah
I want this to last forever between me and you...
Before the night is over, we must do what we came to do
So get the hands up in the air like you don't fúcking care...
And there is only one thing clear for me to say...

Let's talk this fúcking song for this pain...
Put your hands in the air
I came to have a good time, hands in the air
I came to have a good time, hands in the air
I came to have a good time, hands in the air
Lyrics courtesy of www.eliterics.com
I came to have a good time
Good time good time time time time
Came to have a good time time with you
Came to have a good time time time time
Came to have a good time time with you

I got that fire fire fire
Make you burn to the floor
Cause it makes people higher
Make you wanna have some more
I got you moving moving moving from the rhythm...
And I know you like a sip of my petrol, (my petrol)
Have you drinking drinking,... getting, getting higher
I got hands up in the sky we ain't gon' stop...
We gon' take it to the top
I got the beat to make you rock
I got the beat to make you move
And make you stop

Lets see the hands in the air
I came to have a good time, hands in the air
I came to have a good time, hands in the air
I came to have a good time, hands in the air
I came to have a good time
Good time good time time time time
Came to have a good time time with you
Came to have a good time time time time
Came to have a good time time with you
