

Leave The Light On

Craig David

I've been used to living in the darkness
It's all I've ever known
I've been stuck feeling cold and heartless
Yeah, I've been so alone

Then one day you walked right into my life
Now my skin is covered with sunshine
There's just something different about you and I
So, tell me when the darkness falls

Will you leave the light on for me?
Will you stay for the night if I need?
Be my ride or die through the lows and the highs
When I'm not by your side, tell me if would you leave
The light on for me
Would you leave the light?
Would you leave the light?
The light on for me?
Would you leave the light?
Would you leave the light?
Would you leave the light?
The light on for me?
The light on for me?

Now I'm living, floating up on cloud nine
I don't wanna come down
I can't believe that I get to call you mine
Look at the love we found
I think about the day you walked in my life
I thank God every time you're by my side
There's something so different about you and I
So, tell me when the darkness falls

Will you leave the light on for me?
Will you stay for the night if I need?
Be my ride or die through the lows and the highs
When I'm not by your side, tell me if would you leave
The light on for me
Would you leave the light?
Would you leave the light?
The light on for me?
Would you leave the light?
Would you leave the light?
Would you leave the light
The light on for me?
The light on for me?

Leave the light
Leave the light
Light on for me?
Leave the light
Leave the light
Leave the light
Light on for me?

Will you leave the light on for me?
Will you stay for the night if I need?

Be my ride or die through the lows and the highs
When I'm not by your side, tell me would you leave?
Will you leave the light, yeah

Will you leave the light on for me?
Will you stay for the night if I need?
Be my ride or die, through the lows and the highs
When I'm not by your side, tell me if would you leave?
The light on for me
Would you leave the light?
Would you leave the light?
The light on for me?
Would you leave the light?
Would you leave the light?
Would you leave the light?
The light on for me?
The light on for me?
