

I'm losing myself and I don't know how  
My hand holds my enemy, my best friend now  
There's too little talk and so little space  
I cannot breathe till I have my taste

I said let me breathe  
I'm coughing and I'm heaving

I said let me breathe through the guillotine  
It's playing with fire, it's fucking obscene  
Breathe, will you ever learn?  
It'll stab you in your back when your back is turned

It's an invisible war against ourselves  
The soldiers wear clothes we recognise  
We won't set ourselves in our own demise  
We'll let Darwin cry, we won't compromise

I said let me breathe  
I'm coughing and I'm heaving

I said let me breathe, through the guillotine  
It's playing with fire, it's fucking obscene  
Breathe, will you ever learn?  
It'll stab you in your back when your back is turned

I said let me breathe  
I'm coughing and I'm bleeding  
I said let me breathe  
I said let me breathe
