

Caught Between the Rock n' Roll

Crazy Lixx

They said, stay home, take a walk on the lonely road
I know that it's gonna drive me crazy
Stage lights, think twice, we don't want you going home tonight
I know (whoa-oh-oh-oh), you're the only one to save me

If there's something good 'bout this disease
It reminds me what you mean to me

When you're caught between the rock and roll
It's alright, another night will save your soul
Free your mind and lose control
When you're caught between the rock and roll
Caught between the rock and roll

Overtime, overdrive, my heart's beating but I'm not alive
I know this is gonna drive me crazy
Late nights, stage dives, I know where I'd rather be tonight
I know when you're coming back, you'll save me

If there's something good 'bout this disease
It reminds me what you mean to me

Caught between the rock and roll
It's alright, another night will save your soul
Free your mind and lose control
When you're caught between the rock and roll

If there's something good 'bout this disease
It reminds me what you mean to me

Caught between the rock and roll
It's alright, another night will save your soul
Free your mind and lose control
When you're caught between the rock and roll
Caught between the rock and roll
When you're caught between the rock and roll
Free your mind and lose control
When you're caught between the rock and roll

That's right
