

## Born Cold

Creeper

I was born cold, so much colder than you  
A transparent brute  
A black heart you see right through  
You're all spirit, all auburn and morning  
I'm the smoker's health  
The hang man hangs himself

Do I look so good that you wanna treat me bad?  
We sleep together me and you because we've nothing else to do

Midnight and back in luck  
On the hood of your father's truck  
Fall fast and feel the devil at the wheel

Do I look so good that you wanna treat me bad?  
We sleep together me and you because we've nothing else to do  
Do I look so good that you wanna treat me bad?  
We sleep together me and you because we've nothing else to do

Try to feel, try to feel anything  
Pretty boys, pretty girls, petty promise rings  
Let's die young and swoon  
Let's both be doomed together

Try to feel, try to feel anything  
Pretty boys, pretty girls, petty promise rings  
Let's die young and swoon  
Let's both be doomed together

Try to feel, try to feel anything  
Pretty boys, pretty girls, petty promise rings  
Let's die young and swoon  
Let's both be doomed together

Do I look so good that you wanna treat me bad?  
We sleep together me and you because we've nothing else to do  
Do I look so good that you wanna treat me bad?  
We sleep together me and you because we've nothing else...
