

Damned and Doomed

Creep

Let me hold your head as the world burns
Kiss your lips as it ends
Fumble with your belt as the icecaps melt
All the prettiest boys and girls flirt with death

I was born to die with you
Young and in love but damned and doomed
My love the end is coming soon
So kiss me hard the way you do

Can we dance on the edge of forever
Die like stars in the night
Make out with me all while they make out
We are too young to love
To fall, fuck or fight

I was born to die with you
Young and in love but damned and doomed
My love the end is coming soon
So kiss me hard the way you do
