

Break Down the Walls

Crematory

Light and shadow kiss on the abyss
Nothing is really lost
A dark dream without any confidence
Nothing that redeems the clear mind
The creature's crying out for nourishment
An afterlife with no tomorrow

(Endless night in their heart)

Break down the walls
The night conceals the shadows
Break down the rules
The blood money was folded
Break down the walls
The monster has awakened
Break down the rules
The world is freezing cold

From the beginning and to the end
A dream full of darkness
The black sun is going down in the realm of lies
Finally together in the sleep of death
The carnation suffocates in despair
Regardless of all actions

(Endless night in their heart)

Break down the walls
The night conceals the shadows
Break down the rules
The blood money was folded
Break down the walls
The monster has awakened
Break down the rules
The world is freezing cold

We even conspired against everyone
That we don't remain losers forever
Better turn away from the believers
And sell your soul to the devil

(Endless night in their heart)
(Endless night in their heart)

Break down the walls
The night conceals the shadows
Break down the rules
The blood money was folded
Break down the walls
The monster has awakened
Break down the rules
The world is freezing cold

Break down the walls
Break down the walls
Break down the rules
Break down the rules

Break down the walls
Break down the walls
Break down the rules
Break down the rules
