

We are drifting in darkness - we fade to finally disappear
The gloom of our holyness - unbounded living in fear
I'm lost in a cycle - my thoughts are falling
And I'm fighting nevermore - true lies and stories drown

Light over light - I will never go
This falling light in another day
When you will come - I carry on
What is claimed is for my deepest within
Why I am here - I'm done with you
Run full in the deep and gatherful
One by one - what even more
All of my dreams are remembered

We are running out of time - we destroy to finally be free
The faces of our enemies - unlimited on my knees
I'm lost in a cycle - my thoughts are falling
And I'm fighting nevermore - true lies and stories drown

Light over light - I will never go
This falling light in another day
When you will come - I carry on
What is claimed is for my deepest within
Why I am here - I'm done with you
Run full in the deep and gatherful
One by one - what even more
All of my dreams are remembered

Voices in your head - voices in your head
Voices undreamed - voices unfold
Voices undreamed in your head - to remember
Voices - voices - voices - to remember

Light over light - I will never go
This falling light in another day
When you will come - I carry on
What is claimed is for my deepest within
Why I am here - I'm done with you
Run full in the deep and gatherful
One by one - what even more
All of my dreams are remembered
